COVID-19 Notice

COVID-19 has entered the Wahta community as of today January 16, 2021. There are currently two cases of positive test results. The health unit has made contact and there doesn't seem to be great cause for alarm at this point. Individuals will be isolating and self-monitoring for a two-week period.

Even though these people have been extremely careful with their travels, wearing a mask, and physical distancing, they still caught the virus. This is an example that we must all practice safety and there is no room for error.

It is critical that all members of the community stay at home with their own household and not visit other households or have visitors.

By staying home, you are limiting the ability of the virus to spread and you are not spreading it to other vulnerable people such as our elders.

You should only go out where other people are for essential purposes such as for groceries, prescriptions, and medical appointments. Below is a link for further information from the Ontario Ministry of Health.

Stay at home. Protect yourself. Protect others.
